

# An admin for your small business

Presented by Shivangi Sharma, Sharon  
Adeyemi and Prabesh Kunwar

Pitching presentation

**Admin  
AI**

## Triggering Event

### Problem

# Too Many Documents, Too Much Distraction

When the documents can provide insights for business decisions, why not keep them organised ?

01

### Document Overload problem

Managers still categorise the documents manually, small businesses don't have a system to manage docs

02

### Sorting, searching, missing data

Some information is crucial for meeting reporting standards and customer needs, you can't miss them

03

### Small business uncertainty

Small businesses lack the BI tools that may help drive business decisions

## Desired Outcome

Solution

# AI Assistance

Industry standards providing the AI assistance in managing documents and solution that tackles your information for business insights

**Simplify your  
business  
admin**

---

SOLUTION 01

**AI to categorise documents**

---

SOLUTION 02

**Decisions based on your data**

---

SOLUTION 03

**Snap and go - it's that easy**

---

## Alternatives / Problems

### Direct competitors

Quickbooks and spreadsheets are manual, and require an added cost to enable NLP and OCR

---

QUICKBOOKS

EPSON RECEIPT

EXCEL

### Indirect competitors

Microsoft BI, square provide a niche business service with integrations that add cost, dropbox is not a solution

---

MICROSOFT BI

SQUARE

DROPBOX

## How we create value?

- UVP question 1

**What is our true competition?**

---

Quickbooks, Excel are manual, technical, Epson provided NLP, OCR with Quickbooks only

**What is the problem addressed with the true competition?**

---

Business transactional recording and analysis in the palm of small business people

- UVP question 2

# UVP

Do what you love to do, without spending time in documents

**Defensible solution**

# Unfair Advantage

—  
What makes our business completely unique

Unfair Advantage 1

**Insider's Information**

UI/UX solution that is accessible with minimal learning time

Unfair Advantage 2

**Company Collaboration**

Build Engagement Model partner advantage with Google Cloud

Unfair Advantage 3

**Application Technology**

The application is built using the Google's AI platform

# Revenue Stream

Subscription model includes features of categorisation, premium features allow you to have analytical features based on your business

**1 Subscription**

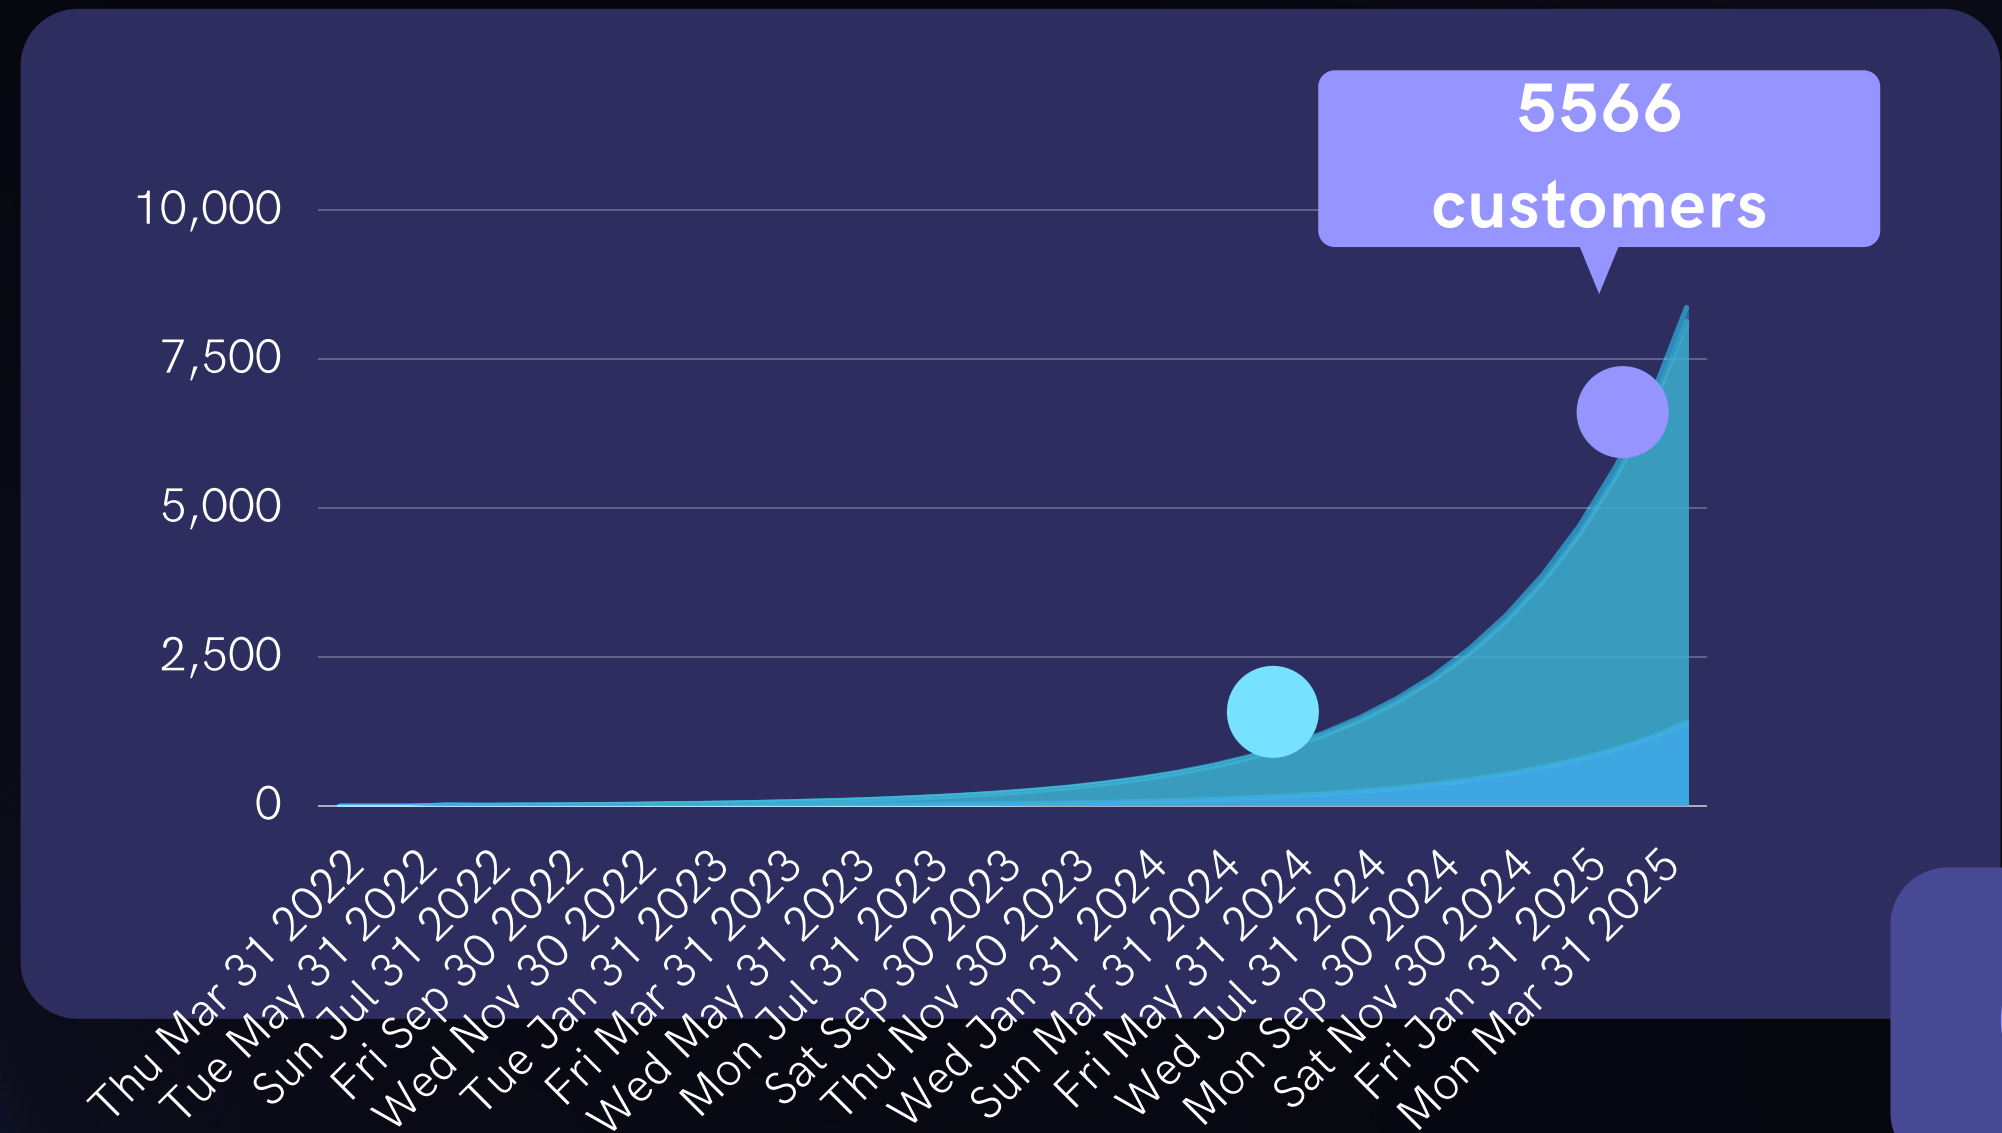

**2 Premium**

**3 Freemium**

# Traction Roadmap

...

Minimum  
Success  
Criteria \$2MM

Pricing is \$30/user/month for a customer life of 2 years and acquisition rate of 10%

1

90 day Goal: 5566 customers by April 2025

2

Product Market fit: 556 customers by Apr 2024

# Our Plan

Our AI application plans to be an organiser and help businesses make key decisions to remove uncertainty

Small businesses don't need to be surrounded by manual paperwork, when the business can leverage NLP and OCR to save wasteful hours

Further define our early adopters and customise app by understanding their business process and needs

Developing a strategy for our application, releasing on a feature basis, with the AI platform

Key industry partnerships to improve our analytics and support our AI solution

# Our team

Let's meet our young team members  
who would be budding graduates and are  
passionate about the problem

**SHIVANGI SHARMA**

**Founder and CEO**

Admin and 4th year CS student

**SHARON ADEYEMI**

**Lead Engineer**

4th year Engineering student

**PRABESH KUNWAR**

**HCML specialist**

Health worker and CS student

# The Ask

Call to Action

## PHASE 1

\$ 50 K

3-12 months

Family and friends, Innovation PEI  
Ignition fund, Panther Pitch

## PHASE 2

\$ 100 K

4 - 12 months

NRC IRAP

## PHASE 3

\$250 K

4 - 12 months

BDP or AIF
